Downloading Knowledge Base Articles as PDF Files

You can take your knowledge base articles offline by downloading them as PDF files. The downloaded PDF file will be readable, print-friendly, and contains images and table of contents. Agents can download PDFs of articles on the support interface, while end users can do the same on the Help Center. You might want to download article PDFs to:

- Share customers offline printed instructions
- Provide agents with an onboarding handbook
- Support previous versions of your product
- Take them on the go without needing an internet

> ⓘ **Permission Required**
>
> Users with the **Support Channels** administrative permission can access this feature.

> Check Feature Availability and Limits

**Note:**

- You **cannot** download articles as PDFs in bulk.

To download a PDF of an article:

1. Click the **Knowledge Base** (KB) module.
2. **Open** an article to view its details.
   Note: You can download only **published** articles to PDF.
3. Click the **Download as PDF** (📄) icon in the top right area.
   The article's PDF will be generated and then downloaded to your computer.

Battery issues

If your battery is dying faster than in the past, see whether apps are using too much battery. If you get a notification that an app is using battery, that app is using battery while you're not actively using the app. You can force stop or uninstall problem apps.

To download a PDF on the Help Center:

1. **Navigate** to the article whose PDF you want to download to your computer.
2. Click the **Download as PDF** icon (📄) located alongside the article's title.
   The article's PDF will be generated and then downloaded to your computer.

ZPHONE / FAQ / EXPOSURE CONTROL

Long exposure photography   📄 🖨 ≡

For long exposure photography, you would need to open your native camera app, go to **Settings**, and choose **Exposure**.

You would see a vertical orange line on your zPhone screen with a sun icon on the left of the focus box. When you swipe to your right, the exposure increases, and when you swipe left, the exposure decreases.

Of course, long exposure shots look good only when you use a Tripod, (that you can order from our online store at https://www.zylker.com/accessories) and the Zylker ear buds to trigger the shutter (to avoid shaking the device with your hand).
